StatFinn and EPID Research present strong growth in 2016

(Espoo, Finland, 11.4.2017) Contract research organization StatFinn reports strong growth in financial year 2016. StatFinn merged its clinical data analytics business with Real-World Evidence company EPID Research. The pro forma financial statement shows total sales of € 4,7 million with a growth rate of 49,2 percent. Earnings before taxes doubled to € 0,7 million.

“With the merger, we can offer a full range of services to our clients from Phase I to Phase IV and beyond. We expect our strong global growth to continue in 2017,” says Eero Mertano, CEO of StatFinn and EPID Research.

StatFinn employs over 70 experts with presence in five countries: Estonia, Finland, Poland, Sweden and Switzerland.
